Yucca Valley Airport District

6804 Warren Vista Ave.

Yucca Valley, CA 92284

Attn: Christopher Saliciccoli

Project: Runway Repairs at Yucca Valley Airport

Dear Mr. Saliciccoli,

I am writing this letter to give notice to the Yucca Valley Airport that Griffith Company, Matich Corporation, and our other Subcontors/Suppliers can not provide any guarrantee that the existing cracks that cover the runway will not eventually transfer through the proposed overlay. In addition, it is unknown how long the proposed overlay will last before cracking begins to take place through the new pavement.

The condition of the grade below the pavement plays a major role in the performance and usefull life of pavement, and since we are not changing the condition of the grade that supports the existing runway, it is likely that what has caused the initial cracking will eventually cause the pavement that we place over the existing runway to crack as well regardless of the thickness.

The relationships we build with our Clients is what has helped our Company stay in business for over 100 years. Both Matich and Griffith have been in business since the early 1900's. Before we move forward with the overlay repair, we want to make certain that the Yucca Valley Airport is aware of the risk of the existing cracks returning through the new pavement, and there will be no warranty associated with future cracking.

Respectfully,

Charlie Pessa
